Course - Forms

Name:

1 - Consider the robots:
- Hadrian X from FastBrick Robotics
- Roomba from iRobot
- Aibo from Sony

Identify the cycle Sense-Compute-Act on them, the identified sensors, possible sensor fusions, the identified actuators and possible PID controllers (it's ok to use the internet for more information).

2 - Can you think of some use to what you learned in this course?

3 - Give 3 ways to break a drone you control? And to break a drone that other person controls?

How interesting was this course?

□ Taking this course was a really bad idea.   □ I think I slept.   □ I really want to sleep.
□ I'm happy to take this course, but I'm not sure if I have a good reason to be here.
□ I liked the course and I want to use a robot.

Can you talk more about it?

Any additional feedback?
